ABOUT US

Anhui Redfoxpack Technology Co., Ltd. is a professional manufacturer of plastic tubes, bottles and jars, for a variety applications including cosmetics, personal care, beauty, food, pharmaceutical, daily use, had sanitizer and industries.

Redfoxpack covers and owns the land of 16,000 square meters, and workshops 25,000 square meters, including Class 100,000 level GMP purification workshop, and hygiene standard purification workshop for food and pharmaceutical packaging.

Sustainable & Biodegradable Materials:

Redfoxpack has developed the sustainable and green packaging of tubes, bottles and other injection products by using PCR, PLA, PMU, OBP(Ocean Bound), Sugarcane, Paper Plastic, and Plant-based fibers such as Rose, Aloe, Olive, Fragrants, Straw, Bamboo, Tea, Wood and Coffee Ground materials which are eco-friendly and biodegradable.

Certification:

Redfoxpack is a GMP certified factory, and certificated by ISO9001, ISO14001, ISO22716, ISO45001, SA8000 and BRC certification etc. We are a SGS certified print facility and get the GMI certification for CVS pharmacy and Walgreens; Audited by UL and Costco. The products pass the testing certification of FDA food packaging, Europe Council Regulation, PPPA CR Packaging, CPSIA, US California Proposition 65, Limit of TPCH etc.

Valued Clients & Brands:

P&G Nerve, Avene, Revlon, e.l.f., Cetaphil, Avon, Mary Key, Sephora, Andrea, Hello Kitty, CVS Pharmacy, Walgreens, equate, RITE AID, Clubman, Revitol, it's 10, Palmer's, body drench, RapideX, Tower 28, Remedy, Briogeo, DUO adhesive, Toppik, DG baby, J.R. Watkins, Eva Mosaic, M&S etc.

公司简介

☆安徽丞欣包装科技有限公司成立于2010年，位于安徽省广德经济开发区，占地面积25亩，现有办公及厂房面积25000平米，拥有12000平米十万级净化车间及卫生等级食品药品包装生产车间，拥有食品包装证书和国家药监局颁发的药品包装证书。公司打造智能恒温恒湿系统，更加精准控制净化生产车间的空气、尘粒、温湿度等达到高标准品质要求。

☆我司专业生产塑料软管、塑料瓶、粉饼盒、各类环保材料和降解材料包装容器，及其他注塑制品和环保制品。公司拥有六层PE管挤出机、全自动注头机、PE挤出吹瓶机、注拉吹一体机、注塑成型机、8色胶印机和6色丝网印刷机、全自动烫金机和对位贴标机、全自动组装机、智能机器人等先进的智能化生产设备和流水线。

☆公司通过**ISO9001, ISO14001, ISO22716, ISO45001, SA8000, BRC**等认证；通过SGS印刷验厂认证获得GMI证书。通过UL、Costco验厂。产品通过多项SGS, UTL检测认证。

☆公司引进先进的**智能化、自动化、数字化**智能制造智慧平台系统，实行专业的EPR, PLM, MES, WMS, AGV等数字化管理系统与AI智能管理系统工业互联，采用先进的视觉检测设备确保品质，采用无人化连线生产和车间无纸化作业，同时实行7S精益生产管理，始终为客户提供高端的品质保障和专业的技术支持，为客户提供一体化包装解决方案。**目前已与美国宝洁P&G、e.l.f.、欧莱雅、丝芙兰、雅漾、露华浓、丝塔芙、花印等国际化妆品品牌战略合作，并与珀莱雅、自然堂、优时颜、三草两木等国内一线品牌和电商品牌，以及科丝美诗、韵斐诗、科玛、如研等高端OEM加工厂商建立长期稳定的合作关系。**

十万级净化车间

Hygiene Standard GMP Purification Workshop

Sustainability

以实现可持续发展社会为目标

Redfox Packaging can safely and effectively package and enhance the value of customers' products. With the goal of achieving sustainable development, Redfox is committed to reducing pollution and impact on the environment, innovating in packaging, and developing containers made of environmentally friendly and biodegradable raw materials. www.redfoxpack.com/sustainability.html

Redfox Packaging通过有形的容器，将客户的商品进行安全美观的包装，提升产品的特性和价值。Redfox包装坚定以实现可持续发展社会为目标，必须时常考虑到容器对于环境的影响，不断探索和研发新的环保材料，积极使用循环再利用材料，同时通过使用来自甘蔗、竹木、秸秆等植物的非石油基生物物质塑料，通过使用碳酸钙无机矿物质塑料，减少石油资源的使用量，为减塑、减碳、可回收、可降解、可持续发展作出贡献。

Eco-friendly & Biodegradable Materials 【PCR, OBP, PLA, PMU, Sugarcane, Paper】

【原材料 - 回收料，海洋料，甘蔗料、降解料、碳酸钙、纸管】

By using PCR, OBP (Ocean-Bound), Sugarcane, Cornstarch, to be instead of the petroleum-based raw material, reduce the usage of the petroleum resource. The PLA is a very eco-friendly biodegradable material. Once in composting conditions, the PLA products will be composted and back to nature environment.

PMU is a mineral degradable material - calcium carbonate (CaCO₃).

By using Kraft Paper, our tubes will be 40% reduce of plastic usage, and Recycling.

Plant Based Fibers

【Rose, Aloe, Straw, Bamboo, Tea, Wood, Coffee Ground】

【植物基纤维 - 秸秆、竹纤维、茶纤维、咖啡渣、玫瑰粉】

We have developed to combine materials with plant-based fibers such as Rose Fiber, Aloe Fiber, Sakura, Olive, Fragrants, Straw, Bamboo, Tea Fiber, Wood and Coffee Ground, which are also biodegradable and can reduce the usage of petroleum raw material and effective utilization of the waste of the plant-based materials.

Unibody Tube with Conjoined Cap

【翻盖连体管 - 管盖一体注头、一体回收】

Redfox develops Unibody Tube with conjoined cap, integrated molding, no additional heading, which is reducing the usage of plastic materials, replaced of the traditional mold that a tube with heading thread then locked an additional cap. The Unibody tubes can be integrated recycling and carbon reduction.

Refillable & Replaceable, Innovation

【可替换、可再装；产品创新、技术革新】

Refillable packaging allows users to continue using a product by replacing the used-up contents in an item's original packaging. Redfox researches and develops new molds and new packaging products with new functions, by using new materials and designs, and inventing new printing and decoration technologies; Innovation and creation of new packagings offer new values to our customers and new experience feelings to the consumers.

Unibody Tube with Conjoined Cap

PCR OBP (Ocean Bound)

回收料，海洋料

Once a material or finished products has served its intended use and has been diverted or recovered from waste destined for disposal, it is then considered "post-consumer". By including the highest amount of recycled content in each item, our containers offer some great environmental benefits, and we save resources for other uses and divert material that was headed to the landfill by repurposing it into a new product. We are excited to give a second (or third) life to the consumed containers and stuff.

Ocean-bound plastic is a term used to discuss the problematic plastic that is likely to wind up in the ocean. Most waste was not overtly destined for the ocean, but mismanagement within coastal regions may be responsible for a certain amount of spillover into these marine environments. We can use ocean bound plastic and turn it into beautiful packaging with Post-Consumer Resins.

甘蔗料

Sugarcane

Sugarcane is an example of a versatile and renewable crop that can be used as a clean source of energy and as a raw material for production of multiple products. Our Sugarcane packaging is made of the green polyethylene made from Sugarcane, which is the result of investments in innovation and commitment to the environment. By using Green Polyethylene, we can offer unique products made from renewable resources that make a significant contribution to reducing the level of greenhouse gas emissions throughout the chain.

Paper Tube

纸管、纸塑复合管

Kraft Paper Soft Tube, is made of paper tube body by connecting with plastic heading and various caps. By using Kraft Paper, our tubes will be 40% reduce of plastic, and recycling. We also can make the heading and cap with recyclable, eco-friendly or plant-based biodegradable materials, to ensure the complete tube and cap are biodegradable and sustainable. Get more: info@redfoxpack.com

PMU

碳酸钙，无机矿物质降解料

PMU is one of our new degradable materials, the main component is calcium carbonate (CaCO₃), adding food-grade polymer and MU additive, then activation treatment by physical polymer hyperdispersion modification, the ultra dispersed and activated raw materials are melted, mixed, extruded and granulated to this material.

PMU complies with ASTM D5511 Standard Testing Method, equivalent to ISO 15985:2014, which can take 779 days in nature environment (in soil and sea) for 90% of the polypropylene component to convert into CO₂, CH₄, water and biomass forms, instead of traditional industry composting.

Biodegradable Packaging

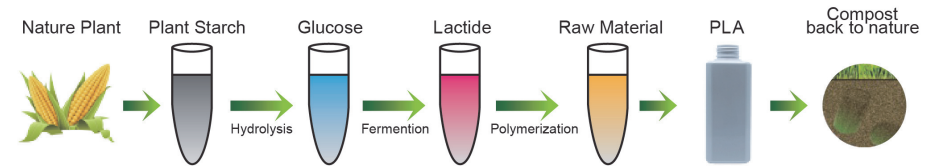

可降解包装

Biodegradable materials (pure polymer, blend product, or composite) obtained from renewable resources could be classified as green polymers, and their attributes have attracted considerable attention for their possible roles as alternatives to petrochemical-derived materials. Innovations in the development of materials from biopolymers, reductions in the use of fossil-based raw materials to decrease carbon dioxide releases, complete biological degradability coupled with decreased landfill use, and application possibilities of agricultural resources for the production of bio/green materials are just a few of the possible benefits of using biopolymers.

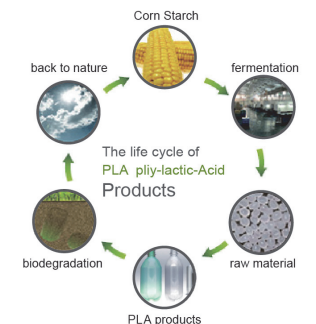

聚乳酸、玉米淀粉降解料

PLA Container

PLA (Poly Lactic Acid) is an eco-friendly material which is derived from plant-based starch. PLA is a very promising raw material, made from renewable resources, an exciting new resin derived from a renewable source, corn and other plant starches. The starched are broken down through a fermentation and distillation process and reduced to a monomer called lactide. We can make daily products from this PLA material via mold injection process. Once in composting conditions, the PLA products will be composted biodegradable and back to nature environment.

Refillable & Replaceable Containers

可替换、可再装

Creating innovative refillable packaging solution is an effective means of acting sustainably. Replaceable and Refillable packaging options are an excellent way to achieve sustainability without sacrificing efficacy and aesthetics. Redfox has developed many types of replaceable and refillable bottles and jars.

Refillable packaging allows users to continue using a product by replacing the used-up contents in an item's original packaging. This is highly convenient and reduces the waste and energy needed to manufacture new packaging, reducing the negative impact on the environment. Brands must ensure that their packaging is as environmentally friendly as possible by understanding the impact of the product on the environment, from concept to the consumer, to truly create a sustained circular economy. 植物基可降解料-植物纤维添加料
 秸秆、竹粉、咖啡渣、茶纤维、桂花、玫瑰花

Plant Based Biodegradable composite Materials Addable Biodegradable Fiber Materials

Feather:

- 1, Biodegradable Plant Based products can be decomposed within 90 days under industrial composting conditions;
- 2, Food Grade materials;
- 3, Application: Biodegradable Tableware, Kitchenware, Daily-use products, Disposable Lunch-box, Packing Bag, Hotel Supplies, Household Products, Stationery, 3D Print, Injection Plastic Products etc.;
- 4, We can provide: Product design, Mold drawing and tooling, Injection, Production and packing.

软管篇

Chapter I – Plastic Tube

We produce and offer flexible PE tube, Laminate ABL tube, PBL tube, Lazer tube, PCR tube, Sugarcane tube and Biodegradable tube with: layers from mono-layer, double-layer to five-layer EVOH tube; shapes from round, oval to flat shape; diameters from 12.7mm to 60mm; capacities from 2ml to 500ml, custom length of tube body (adjusted within the range of tube capacity); decorations up to eight-color offset printing, six-color silkscreen printing, hot-stamping and labeling as well as gliding technics; colors from transparent, white to colored; coating finish in gloss, matte and soft touch; caps in screw cap, stand up fez cap, screw-on flip top, snap-on positioned flip top, nozzle tip cap, ribbed screw cap, tear-off cap, acrylic cap, anti-backflow valve cap, center-dispensing twist off cap, mascara brush tip, felt tip, silicone tip, dropper tip, roll-on ball tip, cotton tip, comb, airless pump, metal and ceramic applicator etc. with custom colors and shapes.

我司生产的塑料软管有双层、五层PE软管，铝塑复合管，全塑复合管及高亮镀铝片材管，同时可生产PCR和可降解等环保材料软管，管径规格包括Φ13、16、19、22、25、30、35、40、45、50、55、60mm，管型包括配套金属头、陶瓷头、毛刷头、植绒头、硅胶头、滴管头、滚珠头、棉签头、唇膏头、按摩头、震动头、拧断头、防盗盖、撕拉盖、旋转牙盖、亚克力盖、防回流盖等各类软管和椭圆管，及各类尖嘴医药管和机油管等。产品被广泛应用于化妆品、美容美发、个人护理，日用品、洗手液、消毒液、医药、食品、宠物用品、化工等领域。

塑料瓶，膏霜瓶

Chapter II - Bottle & Jar

We manufacture and offer Blowing Bottles, Airless Bottles and other Plastic Injection Lotion Bottles, Acrylic Jars, PETG Jars, PP Jars with single wall and double wall components;

By using the material of PET, HDPE, LDPE, MDPE, PP, AS, ABS, PETG and Acrylic (PMMA) etc.;

Shapes from Imperial Round, Boston Round, Cylinder Round, Rotatable Round, Evolution, Square, Oval, Oblique Tapered, Crystal Square and Diamond Square, Triangle, Tottle shape and other special shape and custom shape accepted;

Multiple neck sizes 18/410, 18/415, 20/410, 20/415, 24/410, 24/415, 28/410, 28/415 etc.;

Decorations up to 5 colors silkscreen printing, hot-stamping and labeling as well as shrink sleeve; Closures in screw on cap, flip top cap, snap on cap, disc cap, dropper tips, sprayer, pump, trigger and other types of closures matched with custom colors and shapes.

丞欣包装拥有全自动注塑成型机、吹瓶机及注拉吹一体机，可生产挤吹瓶、注吹瓶、真空瓶、膏霜瓶及各类注塑瓶。瓶型包括圆肩形，圆柱形，斜肩形，椭圆形，四方形，可替换装等，特殊瓶型可定制模具。瓶子种类和材质包括甘蔗料，PLA聚乳酸及可降解料，PCR可回收料，PET, HDPE, LDPE, MDPE, PP, AS, ABS, PETG, PMMA, Soft Touch 柔感原料瓶。可提供丝网印刷、贴标、缩膜、盖子点胶及塞垫片等配套服务。同时配套生产和提供种类丰富的光面和螺纹旋盖、翻盖、炮台盖、千秋盖、尖嘴盖、干燥剂盖、喷头、泵头等。产品被广泛应用于化妆品、美容美发、个人护理，日用品、洗手液、消毒液、医药、食品、宠物用品、化工等领域。

Cosmetic & Personal Care

化妆品及个人护理

Our bottles are popular in application for Cosmetic and Personal care products, including skin care, body care, face cleanser, shower gel, eye cream, eye essence, lotion and cream etc. Redfox can make our bottles with custom molds, custom colors, fantastic decoration, to help your products with charming look.

丞欣包装独特的吹瓶生产线为化妆品和个人护肤品提供定制化和多样化的瓶型和包装，可实现不同的工艺要求，使产品包装彰显优雅大气。

Beauty & Hair Care

美容美发

Our bottles are also popular in application for beauty and hair care, hair conditioner, hair gel, hair spray, make-up foundation, lip essence, eye adhesive etc. Luxury packaging of your beauty & haircare products will make your brands be confident, vibrant & beautiful!

美容美发产品是最时尚流行的产品，具有很大的市场潜力和前景。我们为美容美发产品提供高端奢华的容器包装，尽显自信和美丽！

Pharmaceutical & Health

医药健康

Pharmaceutical & Health products will be the most potential area and market in future, we can produce the bottles and meet the packaging requirement for the products.

大医疗大健康产业将是未来中国最大的消费潜在市场，大力发展健康医疗及医药产品将是重点研发和布局的领域。丞欣包装的塑料瓶容器能满足医药健康领域的包装需求。

Hand Sanitizer & Disinfectant

洗手液和消毒液

Due to the Coronavirus Pandemic, Redfox expands its production lines and produce millions and millions of bottles and caps/pumps to meet the requests for hand sanitizer and disinfectant. Quick leadtime and some stocked items available. Silk screen printing and labeling available.

丞欣包装吹瓶生产线每天可生产50万个塑料瓶，满足疫情期间及良好的日常卫生习惯对洗手液和消毒液的包装需求，可贴标可丝印，瓶型多，交期快。

Daily-use & Animal Care

日用品及宠物用品

With the booming of the daily-use and animal care products, our containers focus on the love and care for the human and animals with more convenient use and humanization design.

随着日用品和宠物用品市场的不断爆发和增长，对包装的需求也越来越独特和人性化，我们的塑料瓶容器不断体现人性化的爱和关怀，更简洁实用。

Industry & Chemical

工业及化工用途

Our bottles can use in some industrial and chemical area, for the caulk, lubricant, lube, adhesive, seam repair, shoe polish etc. Different bottle shape and caps/closures available.

塑料容器在工业和化工领域的用途也比较普遍，比如说润滑油、机油、填缝剂、胶水、鞋油及很多其他工业用品等等。

For Medicine & Pharmacy Packaging

药品包装专栏

Redfoxpack is producing all kinds of orally-taken solid and liquid medicine packing, it's authorized by the drug packaging state. We have 25,000 square meters of Class 100,000 level GMP purification workshop and hygiene standard purification workshop for food and pharmaceutical packaging. Its products, which are produced by using food/drug grade materials of PE, PET, PP, AS, ABS and PETG and widely used for packing solid and liquid medicines, health care products as well as cosmetics with nearly 300 specifications and types, are plastic containers of I category medical packing materials prescribed by State Medical Appraisal Administration.
